

CHAFING KIT *Instructions*

Contents

1 CHAFER (WIRE RACK)

1 ALUMINUM WATER PAN

2 STERNOS

Instructions

1. Set up the empty rack on your table with the water pan on top. If outdoors, be sure the table is level as possible.
2. Fill your water pan with about one inch of water. The water creates the steam that will keep your food hot.
3. Arrange your food pan(s) in the water pan.
4. Remove the lids from the sternos and place them under the water pan in the chafer rack.
5. Light the sterno with a lighter.

ASSEMBLED CHAFING KIT

Notes

- The water in the pans can boil away. Periodically check the water levels in the pans and add more water as needed.
- Typically a sterno will burn 1 ½ to 2 hours, slightly faster if they are outside.
