

VEGETARIAN AND VEGAN MENU INFORMATION

(U.S. Restaurants)

This chart of vegetarian and vegan menu suggestions is based on the most current information from our food suppliers. For these purposes, Vegetarian is defined as not including meat, stock or gelatin from an animal. Vegan is defined as not including animal meat, stock, rennet, gelatin or ingredients derived from animals, including honey. We've also outlined if the item contains egg, dairy or cheese (and what the source of the rennet is – microbial, animal, or vegetable).

Because many of our recipes contain poultry, meat and fish products, our kitchens are not “animal free”. While we use safe food handling procedures, it is possible for any food item to come into contact with animal products during preparation and/or cooking process. Items cooked in our fryer present a special risk for cross-contamination with animal products, so we've clearly identified those for you. All menu items listed as-served, unless otherwise noted. Some menu items may not be available at all restaurants; limited time offers, regional items, or test products may not be included.

IF A DISH OR ITEM IS NOT LISTED HERE, YOU CAN ASSUME IT IS NOT VEGETARIAN OR VEGAN.
